

Ozgene overview

Ozgene USA

OPENED MARCH 20, 2019

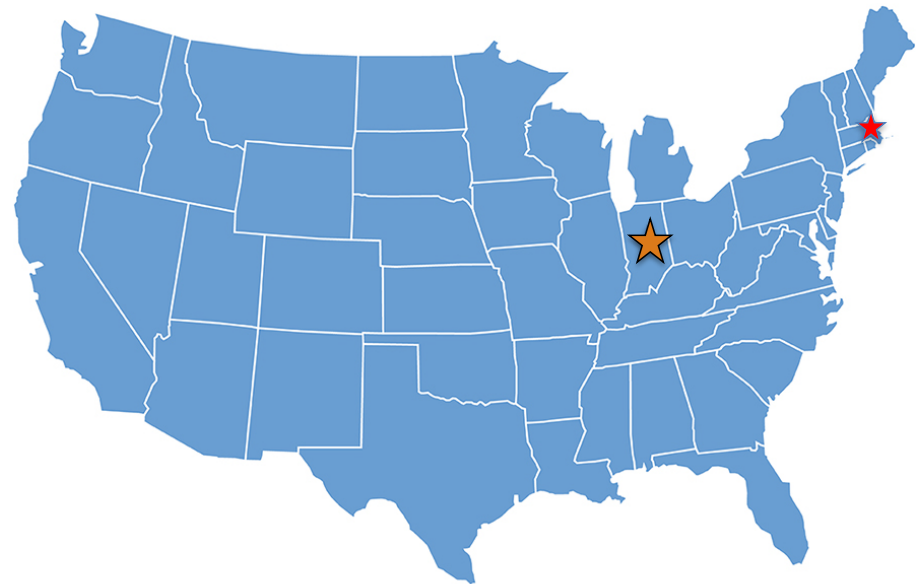

ACTIVITIES NOW

- Custom breeding

FUTURE

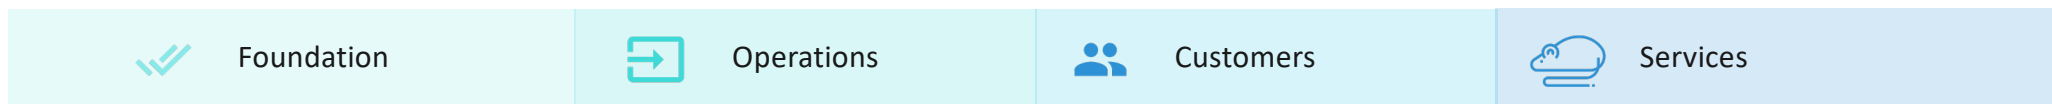

- Genotyping
- Cryopreservation
- *goGermline*[™] embryos
- Expression analysis
- Characterisation

ARC overview

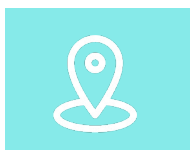

The Australian scientific community relies on the ARC

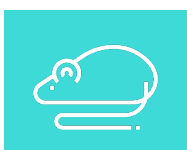

ARC & Ozgene

Leveraging our strengths

BACK TO ROOTS

Collaboration in 2000-2006 when Ozgene located at Murdoch Uni

STOCK LINES

ARC expertise in providing stock lines to the scientific community

CUSTOM LINES

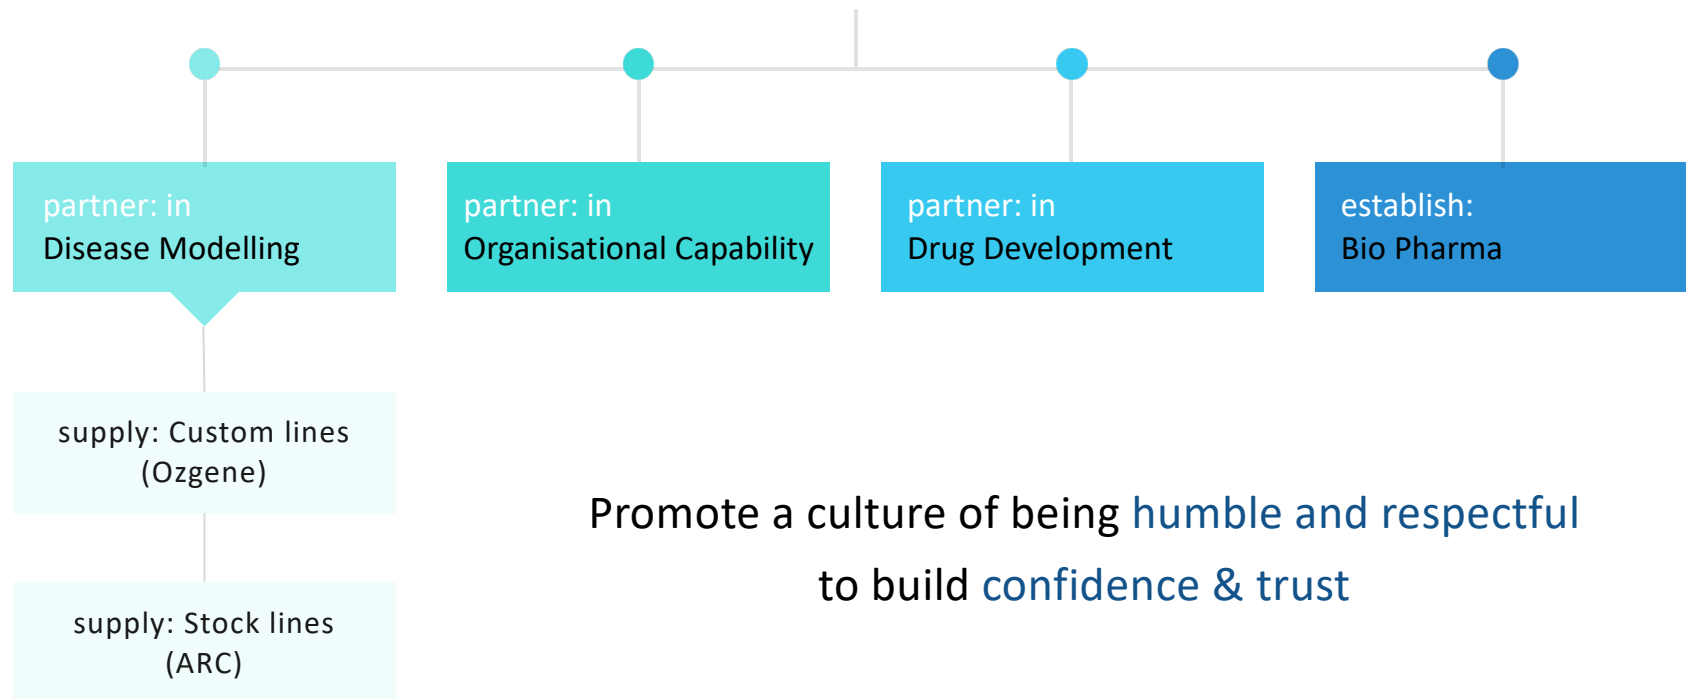

Ozgene expertise in generating, breeding and phenotyping custom mouse lines

VISION & MISSION

Working together to aid medical research 'to advance humanity – inspire curiosity'

Ozgene vision

How?

DEVELOP: PEOPLE

People are our most important asset

MINIMISE: LEAD TIME

Customers value speed

PURSUE: ZERO DEFECT

Get it right the first time

MAXIMISE: ROI

Outcome of the above

Developing people leads to happy customers, employees and stakeholders

INVESTMENT & OUTCOMES

Investments to establish a replacement facility and ensure continuity of the ARC's services

NEW FACILITY

- Retrofit leased premises to allow timelines construction of a purpose-built long-term facility.
- Adjacent to Ozgene's current facility in Technology Park
- Approx. 2000m² of vivarium space
- Across the road from a major WA university campus; Curtin University

DIGITISE VIVARIUM

SHORT TERM

- Implement digital vivarium management software
- Provide tablet devices to enable access for animal technicians

LONG TERM

- Enable scientific community to access research models & data
- Automate vivarium management

INDUSTRY STANDARD EQUIPMENT

- Transition to industry standard animal housing and husbandry equipment

CONTINUITY OF SERVICES

SHORT TERM

- Maintain current services
- Ensure continuation of Australian research
- Genotyping

MEDIUM/LONG TERM

- Increase phenotyping
- Increase client support
- Provide training services
- Expand to new markets
- Mouse repository
- Strategic partnerships
